

Brainstorming & Idea Prioritization Template

Date	15 March 2026
Team ID	TM-OPTICROP-04
Project Name	Smart Agricultural Production Optimization Engine (OptiCrop)
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Tejasree R	Machine Learning engine using NPK, soil pH, climate metrics to recommend optimal crops for maximizing yield.	Precision Agriculture / ML Recommendation	1
2	Teja Sri Anke	Interactive digital suitability tool to evaluate user soil inputs against custom crops and report constraint bottlenecks.	Soil & Climate Compatibility Assessment	2
3	Sravanth Gadiyam	Macro-level analytical platform for researchers and policy planners to visualize spatial trends and farming strategies.	Agricultural Data Analytics & Policy Planning	3
4	Sravanth Gadiyam	Real-time automated alert system for unexpected climate shocks impacting already sown seasonal crops.	Climate Hazard & Predictive Alerts	2
5	K Harish	IoT-integrated soil probe interface transmitting direct live nitrogen/potassium metrics to a Flask backend module.	Hardware Integration / IoT	1
6	Sravanth Gadiyam	Optimal multi-crop rotation scheduling simulator based on structural nutrient depletion trends across seasons.	Sustainable Farming Optimization	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Med/Low)	Importance (High/Med/Low)	Selected (Yes / No)
1		High	High	Yes

Group No.	Final Idea	Feasibility (High/Med/Low)	Importance (High/Med/Low)	Selected (Yes / No)
	Smart Crop Recommendation for Farmers (OptiCrop Core Engine using NPK, pH, Temperature, Humidity, and Rainfall vectors)			
2	Crop Suitability and Environmental Constraints Assessment Engine	High	High	Yes
3	Agricultural Research Dashboard and Regional Sustainable Policy Planning Platform	Medium	High	Yes
